

Sustainability • Resilience
Corporate Social Responsibility
Urban Farming • Circular Economy
Biodiversity • Agro-ecology

**Mindful resource management,
practical and sustainable returns on
investment.**

**The Permaculture Boot Camp lays the
foundation for a holistic and integral
approach of today's complex
challenges in social and economic
regeneration and innovation.**

**The workshops & hackathon provide
bespoke solutions and best practice
for selected key issues of fundamental
importance: our soils, our children and
our food.**

**Summer School is not about the hard
data and information - although we
have plenty - but about warm
connections, wisdom and insight. It's
about people networking. It's about
good company making the good life.**

Make it so!

Elin Olga Magndahl Swedish chef • Summer School Key Facilitator

Permaculture Boot Camp

Connecting the dots between creative and sustainable solutions and the many challenges of today - and tomorrow. This course will change your life. You will discover the tools and skills to design and improve your systems - whether business, organisation or community.

John Button
Dr Francesca Simonetti
Australia / Italy

John is a Permaculture designer, educator and consultant, with over thirty years experience in Australia, South and South East Asia, Africa and Europe, working with individuals, institutions and commercial enterprises.

Francesca is agronomist and counsellor, with more than 15 years of professional experience. She has worked for public administrations, public and private clients.

Workshop Children & Permaculture

Children will be healthier and happier, possibly lower medical costs and higher productivity later in life. Your day care facility or school may turn a profit from the proceeds of the garden. You will discover ways to achieve core curriculum goals by enjoying outdoors activities. You will have a fun experience!

Gaye Amus
Finland / Turkey

Gaye is an environmental educator specialized in early childhood education. She has a special interest in alternative education and passion for early childhood education. Her experiences in this field comes from the Reggio Emilia approach and outdoor education as it is currently taking place in the Nordic countries. She gives workshops and seminars on outdoor learning, forest kindergartens and sustainability in early childhood education.

Workshop Living Soils

Amus

Linder van den Heerik
The Netherlands

Linder trained with permaculture experts Patrick Whitefield, Rosemary Morrow and Tomas Remiarz. With Frans-Jan de Waard, author of "Tuinen van overvloed", he teaches Permaculture Design Courses since 2011. Linder also supports many volunteer projects and does teaching apprenticeships.

Workshop Urban Farming

Great opportunity to meet and work with people you wouldn't normally come across in your own network. Be inspired and achieve something practical beyond your familiar comfort zone. The rush of discovery! Great food and great company. Go home with new friends and new business opportunities.

Leo Bakx
The Netherlands

Leo is a veteran of many hackathons, e.g. Flora Fauna Hack, Age Hack I & II, Hack Food Waste, permaculture designer and teacher at Aardwerk Academy. Involved in urban farming projects like High Tech Campus and Technical University Community Gardens.
